

unleashing abundance

COUNTRY PROFILE
PAKISTAN

Formerly American Refugee Committee (ARC)

Hello Hello!

As we reflect on the past year and welcome what's ahead, I am profoundly inspired by the ways in which our teams continue to do the doable. Long before the approach became prevalent, Alight's teams have been elevating humanitarian work through bold and ambitious commitments to co-creating alongside the communities we serve.

Our teams meet the moment in innovative and courageous ways, responding to needs in more than 20 countries in fragile and challenging circumstances. Over the last 12 months, your continued support and belief in our work has supported one million Ukrainians with temporary housing, health and hygiene products, and other essential items; championed 120 sponsor groups to extend a warm welcome to newcomers to the United States; provided critical resources for 319,000 people in the Horn of Africa impacted by drought and famine; reached 851,000 persons with gender-based violence protection services; delivered health care and lifesaving medicine to 682,000 patients; and provided essential services to 348,000 individuals through Alight's water, sanitation, and hygiene initiatives.

As we look to the future, we have developed and disseminated a 5-year strategy (2022-2027) that concentrates on insights, co-creation, and delivering high-quality services that all human beings deserve. Our long experience in being human centered provides us with a deep understanding of displaced people, and we use these insights to ensure the people we serve continue to feel heard, seen, and valued. Our approach to co-creation also informs our commitment to bringing resources and shifting power to local partners. And in the same spirit, we continue to elevate leaders across our own organization who have lived experience with displacement.

Your generosity and dedication toward Alight have fostered a beautiful community of allies, all of whom are challenging perceptions of traditional humanitarian aid in pursuit of something greater. While the number of people displaced by the ongoing climate crisis, drought, famine, and global conflicts continues to rise, we believe fiercely that displacement – while significant – need not become defining over the course of a life.

Thank you for continuing to walk alongside people who, by matter of sheer circumstance, find themselves on the long journey of displacement. We're so glad you're here.

Jocelyn Wyatt
Chief Executive Officer
ALIGHT

UNLEASHING ABUNDANCE AROUND THE WORLD

We are and always have been about amazing global citizens taking action to change our world. Forty-three years ago, Chicago businessman Neal Ball started the American Refugee Committee (ARC). He recruited a volunteer relief team that deployed to the Thai- Cambodian border. That first ARC team faced terrible tragedy with their incredible energy and belief that anything was possible.

We have taken a significant step in our journey to put into action that same abundant belief, by rebranding from the American Refugee Committee (ARC) to Alight. We remain the same courageous and diverse organization, staffed by dedicated individuals, committed to providing essential services such as healthcare, clean water, education, shelter, protection, and economic opportunities each year to support over 3.5 million people in 22 countries. But in solidarity with the people we serve who are too often defined by a single dark moment in their lives in which they were forced to take refuge, we've dropped the label 'refugee'.

Alight sees and helps every person make meaningful change in the world - from displaced and marginalized communities in Africa, Asia and the Americas to... anyone, anywhere.

Becoming Alight is more than a name change. It's about reaffirming our commitment to "Unleash Abundance" in every person we serve. We're a human-centered organization, guided by our values and the Yellow Book of Alight.

Our transformation to Alight signifies more than a name change; it reinforces our commitment to "Unleash Abundance" in every person. We are a human-centered organization dedicated to creating meaningful and fulfilling lives for displaced individuals, going beyond their basic needs to provide joy, dignity, connection, and purpose.

We are an open family of organizations that works closely with refugees, trafficked persons, and economic migrants, to co-design solutions that help them build complete and fulfilling lives - lives that are Alight!

ALIGHT VALUES

START WITH GIVING

DO THE DOABLE

CHOOSE OPTIMISM

SPARK JOY

FIND OTHERS

BRAVELY BE BETTER

BE HUMAN CENTERED

Assalamu Alaikum!

The unprecedented challenges of recent years: the pandemic, ongoing and recent conflicts, climate change and its cataclysmic consequences – have made us more interconnected than ever before. But this interconnectedness also highlighted the rising inequalities and the importance of constant struggle for global justice and socioeconomic equity.

At Alight we are motivated to work by the knowledge that although every human being has the potential to flourish, not everyone gets a chance to realize this potential. While we continue assisting the people of Pakistan, where we have been present for over two decades, we are also reaching out across the border to the Afghan people, because we truly wish to see them thriving, not just surviving.

Education is the best investment in the future of any nation, and in the last five years, we have aimed to ensure that access to education for every child is the norm, not a privilege. Working in partnership with the federal and provincial governments, we have managed to find - or make - a place in school for over one million children. When the Pandemic threatened to undo all our efforts, we adapted to the changed circumstances by going digital as well as delivering lessons through nationwide radio network to ensure that learning continued even when physical schools were in lockdown.

The success of our million-kids-to-school campaign under the “Educate A Child” program is a remarkable achievement, a battle won, but not yet a triumph. There are still millions of boys and girls across Pakistan and Afghanistan who are out-of-school and deserve quality education.

Starting this year, we have rolled out our five-year human-centered global strategy (2022-2027). The aim is to go beyond satisfying the basic needs of people to empowering them to lead dignified lives. In this strategy, we focus on delivering top-notch services with insights and co-creation. Drawing on our experience in being human-centered, we prioritize displaced people’s needs and empower local partners.

At Alight, we are determined to do better things together. Hence, we invite everyone, from grassroots organizations to international partners, to co-create breakthrough solutions with us, especially in the areas of marketable vocational skills, food security, and universal health coverage.

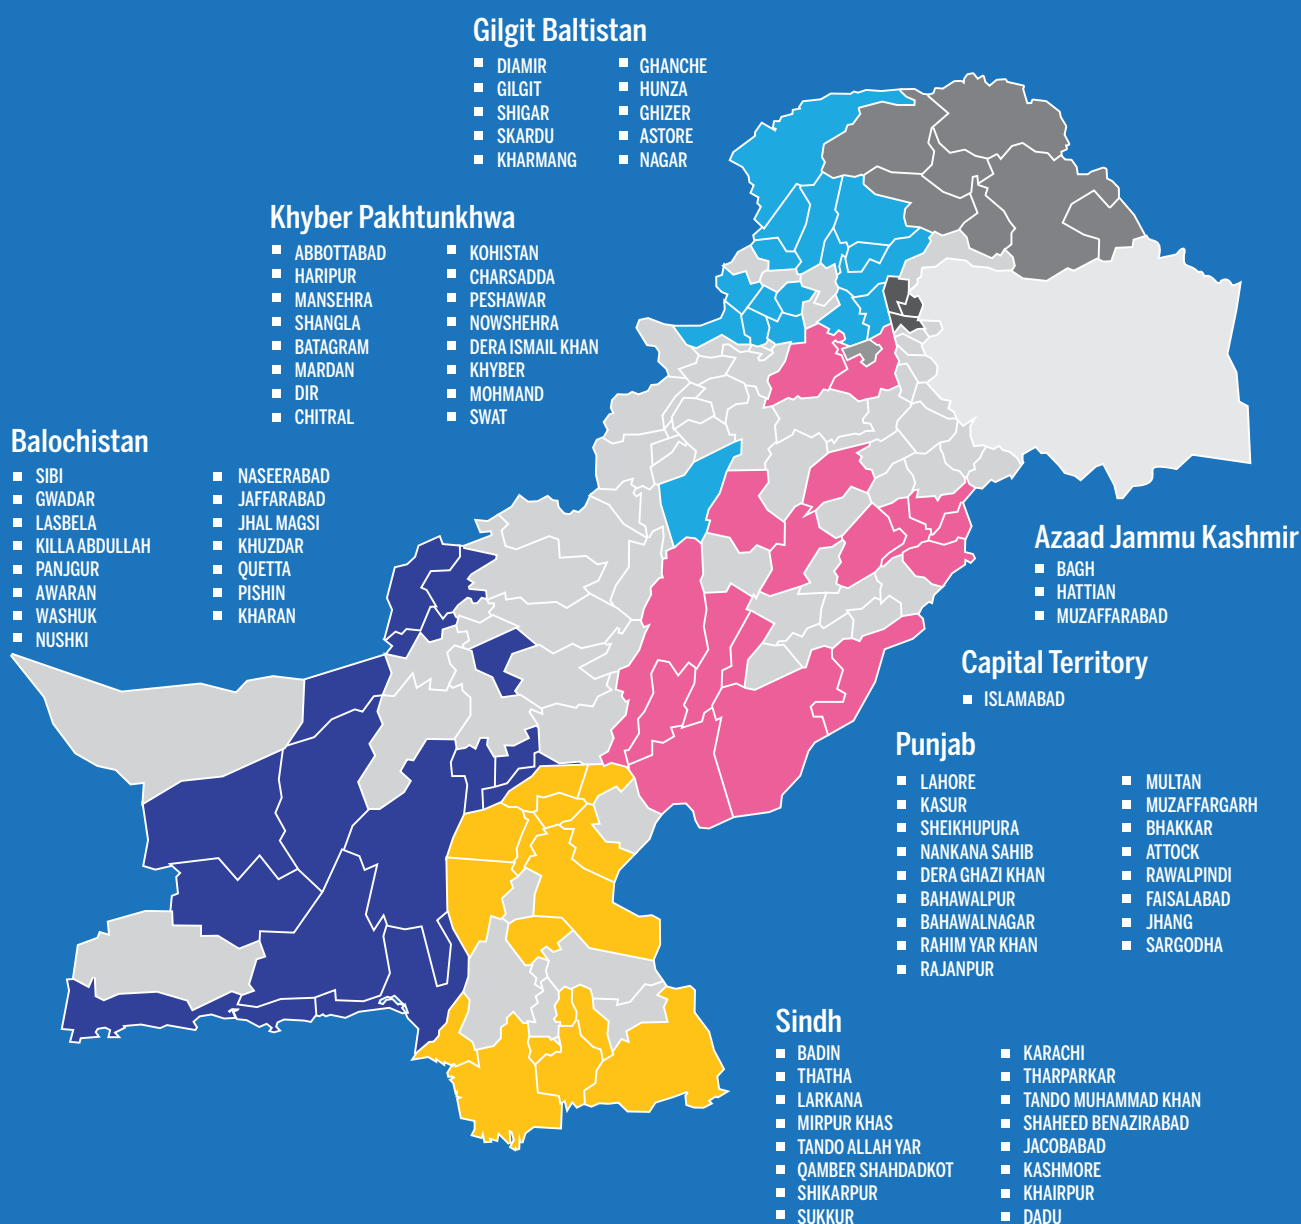

We would be honored to have you join us in this exciting journey of disruption, adaptation, and human transformation.

Sincerely,

Tariq H. Cheema, MD

SERVING PAKISTAN

Since our establishment in Pakistan in 2002, our commitment to providing support and assistance has been unwavering, particularly during a critical period when millions of Afghan refugees sought shelter here. We partnered with the government to provide essential protection services and resilience to the displaced population. Over the years, our dedication to aiding those in need has remained steadfast. Our commitment continues as we stand with Afghan families who once again face a crisis in their homeland following the events of August 2021.

In addition to responding to immediate crises, we have also been at the forefront of addressing long-term challenges faced by the people of Pakistan.

In the aftermath of the devastating 2005 earthquake in Azad Jammu and Kashmir and Khyber Pakhtunkhwa, we mobilized our resources to provide emergency shelter and protection programs. As the impact of climate change becomes increasingly evident and natural disasters continue to pose threats, we have honed our expertise to effectively assist those affected by these environmental challenges.

One of our proudest achievements has been our contribution to education in Pakistan. Alight Pakistan has successfully completed the nation's largest-ever intervention for out-of-school children of primary school age, enrolling more than 1 million children. Working closely with local communities and in collaboration with the Government of Pakistan, we have developed innovative and sustainable strategies for enrollment and retention, all while respecting the cultural values of the regions we serve. We pay special attention to the needs of young girls, facilitating their access to education through the provision of WASH (Water, Sanitation, and Hygiene) facilities, ensuring that barriers to education are dismantled.

Our strength in Pakistan lies in our local connections, understanding, and relationships. We empower youth and Afghan families through tailored skill development programs, bridging communities through mutual respect and knowledge exchange. We not only speak the local languages but also understand the unique dynamics of local communities, forging strong relationships with local governments and community organizations. Our extensive network boasts over 50 working partners across Pakistan, enabling us to reach the remotest villages and urban underserved communities that may have otherwise been overlooked. We learn from one another, and together, we strive to make meaningful improvements in the lives of those we serve.

EDUCATING MORE THAN ONE MILLION OUT-OF-SCHOOL CHILDREN IN PAKISTAN

Achieved Goal	To enrol One Million OOSC in quality primary education schools while strengthening and building on existing formal and non-formal education systems in Pakistan.
Duration & Budget	3.5 Years (Jan 2018 - Jun 2021) - USD 52,000,000 (approx.)
OOSC Target	1,050,000 (One Million and Fifty Thousand)
Locations	56 Districts across Pakistan (Punjab-15, Sindh-11, Khyber Pakhtunkhwa-12, Balochistan-13, Gilgit Baltistan (GB)-2, AJK-2, Islamabad Capital Territory (ICT).
Funding Partners	Education Above All (EAA)-Qatar, Ministry of Federal Education & Professional Training, Pakistan, EHSAAS, Japan International Cooperation Agency (JICA).
Knowledge and Implementing Partners	Allama Iqbal Open University (AIU), National Commission for Human Development (NCHD) Ehsaas Education Stipends (BISP-Waseela-e-Taleem) Federal Directorate of Education (FDE), School Education Department (SED) Punjab, Literacy & Non-Formal Education Department Punjab, Secondary Education Department (SED) Balochistan, Social Welfare Department Balochistan, Bunyad Literacy Community Council (BLCC) Punjab, Labour & Human Resource Department, Government of Punjab, Elementary and Secondary Education Department (KPESED) KP, Elementary and Secondary Education Foundation (ESEF) KP, PIA, Akhuwat, FFC, FPCCI, National Education Foundation (NEF), KarMuqabla, Thar Foundation, Moawin Foundation, Pakistan Alliance for Girls Education, (PAGE), SABAQ, Oxademy Education, Taaleem Foundation, The NGO World, Sanjh Preet, Baanh Beli, Alif Laila Bus Book Society, Jamia Binoria Al-Aalmia.

THE CHALLENGE

An estimated 22.8 million children aged 5-16 are out-of-school

Pakistan is facing a serious challenge to ensure that all children, particularly the most disadvantaged, attend, stay and learn in school. While enrollment and retention rates are improving, progress has been slow to improve education indicators in Pakistan.

Currently, Pakistan has the world's second-highest number of out-of-school children (OOSC) with an estimated 22.8 million children aged 5-16 not attending school, representing 44 per cent of the total population in this age group. In the 5-9 age

group, 5 million children are not enrolled in schools and after primary-school age, the number of OOSC doubles, with 11.4 million adolescents between the ages of 10-14 not receiving formal education. Disparities based on gender, socio-economic status, and geography are significant; in Sindh, 52 percent of the poorest children (58 percent girls) are out of school, and in Balochistan, 78 percent of girls are out of school. Nearly 10.7 million boys and 8.6 million girls are enrolled at the primary level and this drops to 3.6 million boys and 2.8 million girls at the lower-secondary level.

<https://www.unicef.org/pakistan/education>

THE RESPONSE

To enrol One Million Out-Of-School Children in quality primary education schools while strengthening and building on existing formal and alternative education systems

ALIGHT and the Government of Pakistan (GoP) through the Ministry of Federal Education and Professional Training have launched a countrywide program in collaboration with Educate A Child (EAC), a global program of the Education Above All Foundation (EAA), to educate one million Out-of-School Children (OOSC) in Pakistan.

Under this initiative, ALIGHT and its partners have worked diligently to ensure the enrolment

and retention of one million out-of-school children across the country. The Program was designed to address the root causes and barriers to education at the primary level and was aligned with the priorities defined in the National Education Policy 2017 of the Government of Pakistan. The Program has contributed significantly towards strengthening the public education system by bringing together diverse stakeholders from public and private sectors to address the OOSC crisis in Pakistan.

THE RESULT

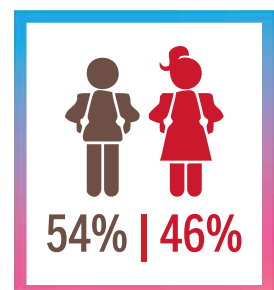

Over One Million Out-Of-School Children of age 6-16 were enrolled and retained across Pakistan during 2018-2021

ADVANCING LEARNING

INTRODUCTION

The right to education is enshrined in international law and many national constitutions, yet millions of children worldwide still lack access to primary education.

This alarming situation is a result of complex challenges, such as financial barriers, limited school availability, gender discrimination, or inadequate capacity in existing schools to accommodate the entire student population, and a lack of qualified educators.

Addressing these intricate issues requires comprehensive efforts and strategic interventions to ensure that every child can exercise their fundamental right to education, regardless of their socioeconomic background or geographic location.

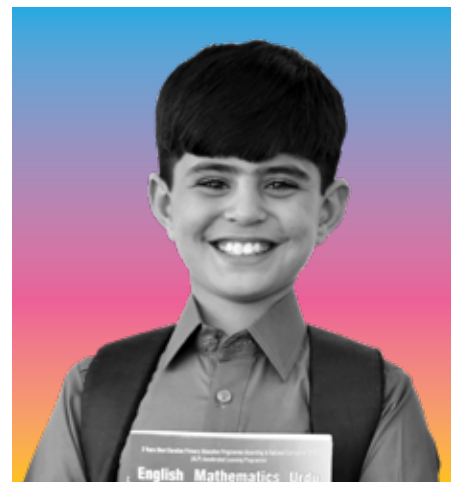

OUR WORK

At Alight, our approach is rooted in a comprehensive understanding of the challenges at hand. We meticulously analyze every aspect of the situation to grasp the nuances of the problem, enabling us to develop effective solutions. Our methodology involves engaging closely with local communities and collaborating with governmental bodies. Together, we co-create tailored interventions that align with the specific needs of each locality. We build the schools, provide basic supplies and expand the capacity of the existing ones. We train the teachers and provide an accelerated curriculum especially designed for the out of school children.

We recognize that there is no one-size-fits-all solution; instead, we believe in the multitude of ways we can enhance and refine the existing educational system by making tangible, albeit sometimes small, changes, which will significantly impact the lives of individuals. Our success is not just measured by the impressive figure of 1 million children enrolled in schools through our efforts; the transformative effect education has on each child we reach is immeasurable.

We view education as a potent equalizer, a force that empowers and uplifts. It is our conviction that education serves as the cornerstone for both the social and economic development of nations. Moreover, we regard it as a fundamental right, a duty we are committed to fulfilling by ensuring access to education for all.

Education is one of the core programs of Alight, and in the last six years, we have put much effort to provide access to education for children and youth. Between 2018 and 2021, Alight undertook Pakistan's largest out-of-school project (OOSC) in collaboration with Education Above All (EAA) and the Government of Pakistan. This project achieved the remarkable feat of enrolling and retaining 1.1 million out-of-school children across 56 districts of the country, all within the allocated budget of \$52 million. Of the total enrolments, 54% (596,458) were boys, and 46% (505,091) were girls.

IMPACT

Children enrolled - **1,111,549**
 Gender Ratio - Boys 54% | Girls 46%
 Partners - 46 (15 Government Departments)
 Schools - 54,218 (Formal & Non-formal)
 Teachers - 183,458

PROVINCE/ENROLLMENT

Punjab	753,318
Balochistan	31,716
KPK	196,018
Sindh	96,787
GB	16,996
AJK	7,745
ICT	12,368

258 million children and youth are out of school, children are out of school in the world. 9 million children of primary school age, 62 million of lower secondary school age, and 138 million of upper secondary age.

Out-Of-School Children or Primary age:

Sudan (19 million), Nigeria (9 million), Bangladesh (8 million), Indonesia (4.3 million) Ethiopia (3.5 million) Pakistan (5 million), and India (1 million).

– UNESCO | Institute of Statistics (UIS) | 2018

In collaboration with the Allama Iqbal Open University (AIOU), Alight established Pakistan's first non-formal education training portal for teachers, known as "Muallim Academy." The training was available in online and offline versions – to enable access for teachers living in remote areas without internet connection. So far, this portal has enabled over 4,000 teachers to complete university-accredited training.

During the challenging COVID-19 pandemic, Alight developed a 30-day radio education program aligned with Student Learning Outcomes (SLO) for Grades 1-5. The Ministry of Federal Education broadcasted the content nationwide on three occasions during school lockdown. Our Radio School has attracted a lot of attention from both national and international media, and the story of the Muallim Radio Program has been covered by British Broadcasting Corporation (BBC) and Voice of America (VOA), among others. Alight has also made the content available on YouTube as open source for all.

Between 2019-2021 Alight implemented the "Gaamzan" project in Gilgit-Baltistan, receiving funding of \$2.6 million from CAI. This initiative was designed to integrate non-formal education and skill development, primarily focusing on girls. As part of the Gaamzan Project, we launched a mobile learning facility (Mobile Van) for our Non-Formal Schools in the Gilgit Baltistan region.

We also enabled some of the brightest and most talented students of Gilgit-Baltistan to attend PIF-run National STEM summer schools. We covered the financial cost of their enrollment and arranged their travel. We also arranged robotics classes for them.

Working closely with Afghan asylum seeker families staying temporarily in Pakistan, we provided them education and introduced robotics' and sports classes for children, which greatly improved their emotional well-being.

We have successfully concluded several educational projects, securing school placements for millions of out of school children. However, the need is still vast. What we have done so far is not an endpoint but a beginning. We're committed to a bigger mission of providing every child with the opportunity to learn for a brighter future.

We are actively pursuing public-private partnerships to drive educational reform in Pakistan, ensuring that a greater number of children can access valuable learning opportunities.

KEY INTERVENTIONS IN EDUCATION

- Out of School Children Program
- Accelerated Learning Program
- Distance learning Teachers' Capacity Building Program – Muallim Academy
- Radio based Education Program – "Muallim Radio Program"
- Supplementary Teaching Materials
- Advocacy and Awareness
- Scholarships
- Infrastructure Development
- Mobile Library
- Robotics Classes and Sports

BUILDING SKILLS

INTRODUCTION

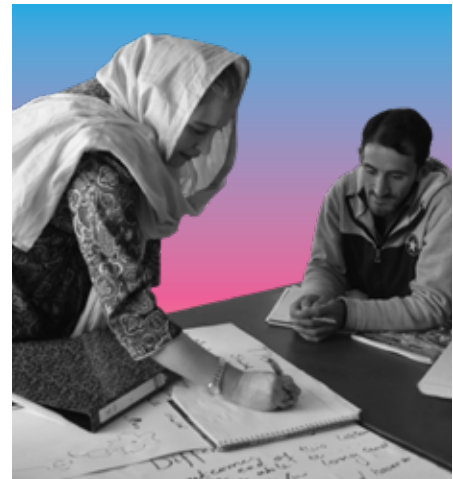

Skill development is key in the fight against poverty, offering individuals a pathway to enhance their economic well-being and escape the cycle of destitution. It empowers individuals to enhance their economic well-being by making them more attractive to employers, leading to better job prospects and increased incomes. Skills also open the door to entrepreneurship, diversify careers, and foster long-term growth, increasing financial independence. Inclusive economic growth driven by skills benefits everyone, while the ripple effects break the cycle of poverty for future generations. Effective skill development, when accessible and tailored to local needs, can create lasting change and improve living conditions in communities.

OUR WORK

Our alimentation and skill development programs are designed to do just that - to give individuals and communities an opportunity to develop their skills and talents, to lift themselves out of poverty and become self-sustainable. We don't come with ready-made solutions - we engage in a dialogue and co-design the solutions based on local needs and resources. We respect indigenous knowledge and traditional skills, and we seek the ways to tap the tremendous value in these assets.

We support the livelihood of individuals, families and communities in many ways, based on needs and circumstances: we deliver vocational training, provide wheat and livestock, teach basic skills needed for job seeking, and supply start-up kits and initial material support to help people help themselves. We believe in people's right of self-determination, and we recognize the importance of equity. We seek guidance and draw inspiration from the organizational capacity of communities. Alight acknowledges the fact that strong communities are resilient and offer the best network of support.

It is our mission to empower the people so that they do not have to seek assistance of organizations like ours. Even though livelihood programs are often focused on people who have lost their means of support as a result of natural disasters, we always strive to go beyond emergency aid. Our strategies are designed for long-lasting positive impact, not just temporary relief.

VOCATIONAL SKILLS

Skills	Graduates
Medical Technologies	108

SUPPORT SERVICES

Vocational Trainings/Courses
Job Placement Support
Job Seeker Platform Development
Provision of Agriculture Inputs
Livestock Distribution
Monetary Support

Our 3 years Gaamzan Project has offered multiple courses on masonry, sewing/stitching and hospitality. Over 250 youth in Gilgit-Baltistan have graduated from the skill-based training. A group of graduates established women-led venture named 'Chuk Photuk Enterprises'. Multiple others are now either employed or running their startups/ businesses successfully creating opportunities for not only themselves but also others.

In 2022, we provided trainings in computer skills, digital marketing, leadership and business analysis skills in collaboration with International Center of Excellence (ICE) to empower Afghan asylum seekers so they can work towards their financial independence.

PROMOTING HEALTH

INTRODUCTION

Having access to primary healthcare is often a matter of life and death. The distribution of health facilities in Pakistan is irregular, and some communities have to travel for hours just to see a doctor. At Alight, we believe that every human deserves human-worthy services, and access to healthcare facilities is at the core of basic human rights. The lack of access to health facilities becomes a bigger problem when disasters strike - one crisis aggravates another, and we have to deal with many wicked problems that require multifaceted solutions.

OUR WORK

Our approach to healthcare provision is a combination of efforts to provide human resource and training, medicines, equipment, infrastructure improvements, health & hygiene awareness raising across Pakistan. We have reached out to nearly 50,000 patients since 2002, trained 3000

healthcare workers and established 39 health facilities in collaboration with UNHCR, UNOCHA, WHO, IMANA, DWW & the Government of Pakistan. Our partnerships are far-ranging – from village health committees to government agencies.

We are committed to providing reproductive healthcare facilities to vulnerable communities, and we strive to overcome obstacles such as cultural norms, social stigma and fear that prevent women's access to midwives, doctors and trained nurses.

In 2022, Alight has provided primary healthcare in response to flood emergency and sponsored 3 Rural Health Centers (RHCs) in Shikarpur and Khairpur. Our "Safe Mother-Safe Family Project" in Sukkur ensured safe deliveries and care for mothers and newborns.

Our dedication to healthcare outreach continues today in Mansehra, Khyber Pakhtunkhwa (KPK), through a fruitful partnership with Doctors Worldwide (DWW). This collaboration has allowed us to significantly expand our services, catering to the healthcare needs of approximately 1000 patients every month.

Our healthcare facilities now offer a wide range of services, including laboratory tests, radiology services, general checkups, outpatient emergency room services, dental procedures, as well as essential services such as deliveries and general surgery. This comprehensive approach underscores our commitment to the health and well-being of the local communities we serve.

IMPACT

Health Facilities Established - 40
Health Workers Trained - 3,000
Patients Treated – 97,332
Households provided with safe drinking water - 11,322

Hygiene Campaign and WASH Services

In Pakistan, ensuring sustainable access to water, sanitation, and hygiene in health centers and schools remains a pressing challenge. Alight Pakistan recognizes the critical role that community involvement plays in driving positive, long-lasting change. We are deeply attuned to the local challenges, particularly those related to hygiene behaviors, and we consider them thoughtfully when co-designing our interventions with our customers. Our integrated Water, Sanitation, and Hygiene (WASH) services have proven highly effective in mobilizing communities to achieve key objectives, such as the elimination of open defecation, improving the availability and safety of drinking water, enhancing storage, usage, and treatment practices, and increasing the availability of WASH facilities in health centers. Furthermore, these efforts have led to significant shifts in crucial hygiene behaviors.

In response to the 2022 flood in Pakistan, Alight swiftly took action to provide essential health and hygiene kits to 9,135 individuals. We also conducted

awareness sessions, reaching out to 2,825 people to educate them about the importance of health and hygiene practices. Further 8,400 people benefitted from our services in dewatering activities and rehabilitating water channels. This action was particularly crucial because the local population depended on the Karez, an underground irrigation tunnel, for their fresh water supply.

Alight Pakistan's karez rehabilitation project was unique in its approach, as it actively engaged local communities through a cash-for-work scheme. This initiative harnessed the power of local knowledge and incorporated cutting-edge technology to rebuild the water channel, ensuring a sustainable and resilient solution to the challenges posed by the floods. This comprehensive approach reflects Alight Pakistan's commitment to making a meaningful difference in the lives of the people we serve and addressing critical issues related to water, sanitation, and hygiene in Pakistan.

DWW Hospital was built after the devastating earthquake of 2005 and registered as a charity hospital in 2017.

DWW is a 50-bed community hospital, that provides essential health services to communities in a radius of 20 km.

Initially, the hospital provided 8 hours of General OPD services. In 2019, the operating hours were expanded to 24/7, and services now include pediatrics, gynecology-gynecology gynecology, dentistry, general OPD, and general surgery.

NOURISHING CHILDREN

INTRODUCTION

Nutrition has been the cross-cutting theme for Alight Pakistan since 2002. Malnutrition is a recognized health problem in Pakistan, and in the local contexts, women and children are vulnerable to severe and acute malnutrition risks because of gender-based discriminatory norms and social inequalities. Our nutrition programs emphasize addressing all forms of malnutrition by reinforcing and strengthening multisectoral programs and policies that aim to improve the diet, nutritional status, and health of mothers, infants, and young children at critical stages of their lives.

CORE NUTRITION INTERVENTIONS

Our 2023 Community-Based Management of Acute Malnutrition (CMAM) Project in Sukkur is an innovative approach involving local communities to prevent, identify, and treat acute malnutrition in children (6-59 months) and Pregnant/Lactating Mothers. It goes beyond medical treatment, putting emphasis on dietary improvements, hygiene practices, and community empowerment through education. CMAM aims to create healthier communities and contribute to overall development and resilience.

CMAM Key Elements:

1. Identification and treatment of Severely Acute Malnutrition (SAM) children
2. Identification and treatment of Moderately Acute Malnutrition (MAM) children
3. Infant and Young Child Feeding (IYCF) practices
4. Provision of food supplements to MAM and SAM children
5. Provision of food baskets for pregnant and lactating mothers
6. Cash for Work (CfW) and Cash for Training (CfT)

Capacity building of healthcare providers is one of the major goals of the Nutrition Program. We offer extensive support and training for care providers in the management of severe acute malnutrition (SAM). Technical and financial support is provided to respective departments of health in capacity building & treatment guidelines.

Our programs also include training in food security, infant & young child feeding, dietary & livelihood interventions through cash-based transfers.

IMPACT

People reached through awareness raising sessions - 62,867

MAM & SAM Children identified & treated - 3,773

Pregnant & lactating women provided with food baskets - 6,775

Staff trained on nutrition concepts - 20

Beneficiaries of CMAM Sukkur Project - 7284

RESPONDING TO DISASTERS

INTRODUCTION

The climate change and its consequences, such as floods, droughts and catastrophic winds, affect world communities disproportionately. Those most vulnerable are often the most exposed. Helping people in such times of crisis requires know-how and quick action, as well as familiarity with local natural, social and cultural environments.

OUR WORK

In Pakistan, natural disasters are becoming ever more common, and the support of humanitarian organizations is crucial. We were amongst the first to respond to the emergency crisis following the 2005 earthquake in Azad Jammu and Kashmir and Khyber Pakhtunkhwa, the 2007 Cyclone Yemyin, the 2010-2011 floods in Balochistan, Sindh and Khyber Pakhtunkhwa and the recent Pakistan floods 2022.

Alight provided significant humanitarian aid in 21 districts during the Pakistan floods. We assisted 91,000 people with shelters, ration bags, and non-food items. We established medical camps and supported rural health centers with telemedicine equipment. We also ensured safe drinking water, sanitation, and hygiene and prioritized women's safety with health and hygiene kits. Our "Safe Mother-Safe Family Project" ensured safe deliveries and care for mothers and newborns. The Temporary Learning Centers established by Alight and partners, offered education, skill development, and psychological support. We also assisted people with dewatering and water infrastructure rehabilitation to promote community recovery and resilience.

In times of sudden loss, providing shelter and food is essential, but we go beyond that. Our emergency aid focuses on restoring hope, helping families rebuild emotionally and financially. We aim to make a positive impact by diversifying our efforts and working on multiple levels.

CORE INTERVENTIONS

- Emergency Shelter Provision
- Transitional Shelters
- Provision of Non-Food Items
- Cash for Work Program
- Primary Healthcare Arrangement through medical camps
- Basic Education Provision through Temporary Learning Centers
- Skill Development Training
- Rehabilitation of water channels
- Dewatering
- Psycho-social support

IMPACT

Shelters Provided – 10,405
 Shelter Upgrade Kits - 4,000
 Emergency Kits - 800
 Non-Food Items Packages – 12,659
 Food Items – 12,106
 Primary Healthcare – 47,332
 Medical camps – 82
 RHCs sponsored – 3
 Tele-medicine equipment – 5
 Health & Hygiene kits – 19,135
 Health & Hygiene Sessions – 2,825
 Women Dignity Kits - 867
 Dewatering Activity Beneficiaries – 1400
 Rehabilitation of water channels – 7000
 Education & Skill Development - 1050
 Food Security & Agriculture – 7000
 Rehabilitation of water channels - 2

PREVENTING VIOLENCE

INTRODUCTION

At Alight Pakistan, we are committed to helping those most vulnerable, and often it is women and children who require extra protection.

Regarded as one of the most powerful tools of the patriarchy, violence against women in Pakistan is both a crime and a socially accepted norm.

Despite there being laws that protect women from violence, their implementation is inadequate, and GBV remains unreported and not dealt with. In some cases, GBV is symptomatic of the breakdown of community structures, and trauma caused by displacement.

The rise of GBV usually follows armed conflict and humanitarian emergencies, adding distress to those who are already suffering.

Alight's approach to gender equity is grounded in a broader philosophy of social inclusion. It is based on one of Alight's core values: the belief that all individuals have the right to achieve their fullest potential in terms of social well-being and human development.

We understand that women and girls are powerful agents of social transformation as well as pivotal contributors to the socioeconomic well-being of the global community.

Our protection program is based on the principles of prevention and response, offering the survivors access to support groups and legal assistance, educating them on their rights as well as coping practices, and engaging whole communities to systematically solve the problem of GBV.

Best Practices of GBV prevention and response

- Religious Scholars Involvement
- Community Support Groups
- Women-Friendly Spaces
- Youth Clubs
- Alternate Dispute Resolution
- Street Theater
- Vocational Skill Training for GBV survivors

IMPACT

People reached through awareness raising sessions: 211,472
 GBV Survivors provided with psychological support: 1,323
 GBV Survivors referred for Legal Aid: 159
 GBV Survivors supported through vocational trainings program: 643
 GBV survivors supported through livelihoods opportunities: 420 individuals
 GBV survivors engaged in Literacy/numeracy classes: 303 individuals
 Youths engaged in GBV prevention through Youth clubs: 2,093 individuals
 People reached through street theater: 1186 individuals
 People reached through religious sermons: 2,629
 Health staff provided with training on GBV: 1749

COVERAGE

SUPPORTING THE DISPLACED

INTRODUCTION

For a long time, it was helping the refugee communities that was the focus of our humanitarian work. Pakistan has hosted some of the largest refugee communities over four decades. The first group of Afghan refugees arrived in 1979, following the Soviet invasion. As the crisis in Afghanistan evolved and deepened, more and more people sought the safety in the neighboring Pakistan. Between January 2021 and February 2022, a new influx of Afghans arrived in Pakistan due to political instability in Afghanistan.

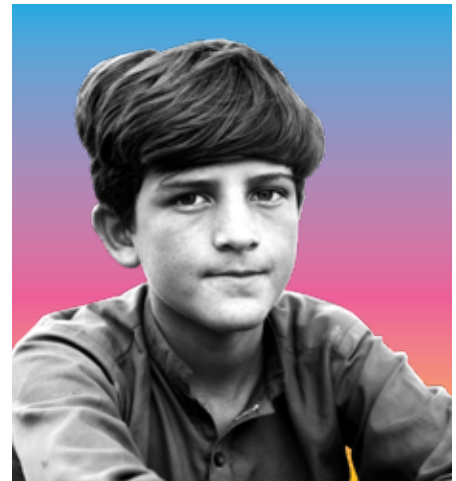

As of October 2023, UNHCR reported 3.7 million Afghans in Pakistan, among them some 700,000 Afghans who fled to Pakistan after the Taliban takeover on August 15, 2021. Pakistan has also traditionally been a destination for Afghan migrants to access services and better livelihood opportunities.

OUR WORK

Since 2022, Alight has worked closely with Afghan families who moved to Pakistan, pursuing asylum in various countries. At the onset, Alight dared to do the doable within its financial and human capacity instead of waiting for donations or grants. Funding from the Government of Canada, a UK-based charity Future Brilliance, and several private donors soon followed. thanks to it we were able to provide comprehensive support to 100 Afghan families, with the unique feature of involving them in project design and delivery. Services included safe housing, psychosocial support, certified IT training for adults, and education for children. Yoga classes for females and robotic classes and sports for children remarkably improved their emotional well-being. Medical assistance was also provided through Al-Razi Hospital, and psychological support was offered by Tameer-e-Millat Shifa University. The project successfully assisted over 50 families in their transition to countries like Brazil, Spain, Australia, United Kingdom and United states within six months. This experience highlighted the value of a holistic approach to serving displaced populations.

Interventions

- Shelter & NFIs
- Food Security
- Healthcare and Nutrition
- Preventing Gender-Based Violence
- Youth Empowerment
- Disaster Resilience Building
- Quality Education Provision and Skill Development
- Water, Sanitation and Hygiene Management (WASH)
- Protection

IMPACT

- Healthcare Services provided to refugees (2003-08)
- Care Maintenance for Afghan Refugees in Balali Balochistan (2008)
- Clean Water supply in Quetta (2008)
- Healthcare services in Afghan Refugee villages of Surkhab, Saranan & Mohammad Khail in Balochistan (2009)
- Care and Maintenance for Afghan Refugees in Balali Balochistan (2009)
- Care and Maintenance in Balali Balochistan (2009) Multi-sector activities in Balochistan (2010)
- Refugees Affected & Hosted Area (RAHA) Kechi Bag (2010)
- Multi-sector response in Balochistan (2011)
- Primary health care services in refugees villages of Surkhab, Saranan & Mohd Khail in Balochistan (2012)
- Rehabilitation and construction of BHU/ Labour room in UC Samungli and Panjpai (2012)
- Primary Health Care Services for Afghan Refugees (2013)
- Strengthening of Primary Healthcare Services at Rural Health Center Saranan, Union Council Saranan, Pishin District (2015)
- Afghan Youth Skill Development Program (2015-2017)
- Education for Refugee Youth (Boys & Girls) in Islamabad (2015-2021)
- Supporting Asylum-Seeking Afghan Citizens (2022-2023)

CLIMATE ACTION

INTRODUCTION

The escalating reality of climate change poses a grave threat to nations and their populations, leading to severe and widespread repercussions. Urgent and strategic measures are imperative to safeguard our communities and fortify our resilience in the face of this crisis.

It is paramount that we equip ourselves with the requisite knowledge and tools to effectively mitigate the impacts of climate change. With the understanding that climate change has already resulted in the displacement of countless individuals, our focus must be on implementing proactive measures to address this pressing issue.

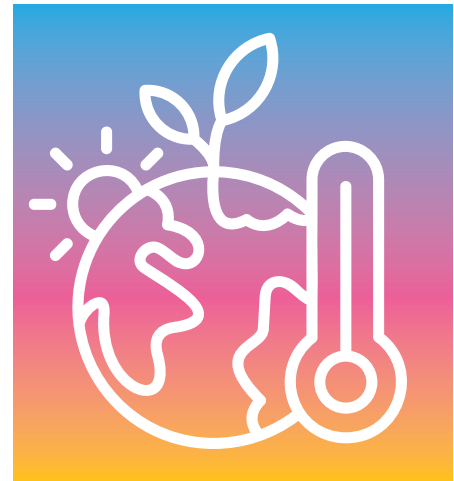

In light of these challenges, it is essential to approach the situation with utmost humanitarian perspective leveraging scientific expertise, policy frameworks, and collaborative efforts with local partners to navigate the complexities of climate change. By adopting a strategic and informed approach, we can work towards not only protecting our people but also building a sustainable and resilient future for generations to come.

OUR WORK

We have established a national-level climate group consisting of knowledgeable partners who understand climate change issues. This group serves as a civil society platform dedicated to promoting climate-smart education in Pakistan. Our objectives include offering technical support to all levels of government (federal, provincial, and district) to integrate climate-smart curricula, provide teacher's training, adopt innovative learning methods, introduce technological solutions, and enhance student enrollment to meet Pakistan's national targets under the Paris Agreement of 2016.

Additionally, we will commission research studies, generate analytics, and develop and release policy and position papers on climate change education. We aim to forge connections with institutional donors, government ministries, academic institutions, and climate change initiatives at both national and international levels. Our commitment extends to representing Pakistan on global and regional platforms as we collaborate with national and global stakeholders to devise institutional frameworks for the design and implementation of climate change education initiatives in Pakistan.

As part of our 5-year strategy, we are prioritizing climate change and aligning our efforts with those who have been displaced due to climate-related challenges.

CLIMATE CHANGE WORKING GROUP

Promotion of climate smart education in Pakistan

Technical support to the government departments

Inclusion of climate smart curricula, teachers training, learning methodologies, introduction of technological solutions and enhancing student enrollment

Research studies, generating analytics, developing and releasing policy and position papers on climate change education

Collaboration with institutional donors, government ministries and departments, academia, climate change initiatives at national and international levels and representing Pakistan on global and regional platforms

ADDRESSING COVID-19

INTRODUCTION

On February 26, 2020, Pakistan confirmed its first case of the Corona virus. As the Pandemic spread around the globe, it exposed vulnerabilities of states and communities and posed challenges exceeding the health sphere. Pakistan's cash-strained economy was stretched to its limits as a consequence of necessary restrictions to prevent spread of the disease. Those most vulnerable, people who support their families by earning daily wages and undertaking low-paid jobs, were the most affected, as the country went under lockdown.

OUR WORK

In the wake of the daunting challenge, we called upon our tried and tested partners to co-create the solutions that could mitigate the suffering of communities.

Alight was among the leading government partners that have effectively responded to the global pandemic of COVID-19 through launching prevention campaigns, providing tele-consults, and establishing isolation facilities. Alight Pakistan mobilized partners and philanthropists to ensure urgent food security for communities in need. We arranged necessary medical equipment through district administration for the safety of frontline medical and paramedical staff. We launched a massive awareness campaign to sensitize the communities about the threat and prevention from the deadly virus, on radio and social media platforms, and reached out to more than four million people. To cater to the educational needs of children, Alight developed radio education program to ensure distance learning without disruption.

Alight Pakistan helped the National Disaster Management Authority (NDMA) in the establishment of 1st dedicated healthcare facility for infectious treatment. Alight's country director Dr Tariq Cheema has voluntarily headed the operationalization of the Nation's first-of-kind Isolation Hospital and Infectious Treatment Center (IHITC), a 250-bedded government healthcare facility established in Islamabad in 2020.

A photograph of a construction site at sunset. The sky is a deep blue with some clouds, and the sun is low on the horizon, creating a bright orange glow. In the foreground, there is a large, curved metal structure that appears to be part of a school building. Several workers are visible on the structure, some standing on beams and others on ladders. The overall scene is one of active construction and innovation.
